Strategic Perspectives

SP Technology Assessment

Overview

Strategic Perspectives provides business-focused Technology Assessments of an IT organization or initiative to evaluate business risk and performance potential.

We will cooperatively identify specific objectives for each assessment to address our client's business issues. These business issues can range from risk mitigation to determining the potential for technology-driven fiscal improvement.

The scope of our Technology Assessment can cover all areas of an IT organization or initiative:

- Technology Strategy
- IT Compliance
- Technology Architecture
- Infrastructure Process
- Network Management
- Project Management
- Information Security Practices
- Disaster Recovery/Business Continuity
- Risk Mitigation
- Application Development/Support

Components

Technology Assessment Steps
- Preparation
- On-Site Assessment
- Analysis And Reporting
- Results Presentation and Discussion

Each Assessment is tailored for our Client's business objectives, including:
- Develop Technology Strategy
- Identify Technology Enablers for Business Operations
- IT-related Business Risk
- Fiscal Plan for technology
